

**Erica Yang** has over seven years of experience in financial services industry as credit risk manager, market risk manager, business analyst and project manager. Prior to joining The Beryl Consulting Group, Ms. Yang was a senior consultant at Deutsche Bank's Investment Bank Finance Division. At Deutsche, she managed a portfolio of projects related to Dodd-Frank and Basel III initiatives. Prior to that, she was an associate director at UBS within flow credit trading desk, responsible for market risk control, independent price testing, valuation and analytics. Ms. Yang was also a senior analyst and project manager within Basel II Measurement and Management Group at Credit Suisse, responsible for Risk-Weighted-Assets calculation, reporting and Capital Management, Strategy and Planning, COO and Treasury function.

Ms. Yang is based in Beijing and assists Beryl's research team in analyzing Greater China managers. She is also responsible for evaluating global long-short credit and structured finance managers that utilize complex instruments as a way to hedge their books and create alpha. Her previous role as a CDS valuation expert at Deutsche Bank and UBS has uniquely equipped her to evaluate funds that partake in corporate and sovereign CDS market.

Erica earned her M.S in Civil Engineering from University of Wisconsin-Madison with minor in Quantitative Finance
