

**Michael Kappeyne FRM, Senior Analyst**, brings over 15 years of experience in banking and financial research. At Beryl, Mr. Kappeyne has interviewed, assessed, and performed due diligence on hundreds of hedge fund managers.

As Research Analyst at SBC Warburg Dillon Read he focused on emerging markets and produced comprehensive analyses of macro-economic, political, and social factors informing the movement of sovereign debt instruments to the EM Fixed Income Sales and Trading team. At Citi, Mr. Kappeyne performed comparative macro-economic research to assess the merits of private equity and direct investment in global emerging markets. His operational management role at Nomura deepened his banking expertise and provided him with keen insight on operational due diligence as well as structuring and controlling complex international banking operations. His dual background in finance and engineering has enabled him to develop expertise in the now vital renewable energy space.

Mr. Kappeyne's holds an MBA in Finance from New York University's Stern Business School, an MS in Mechanical Engineering from Rensselaer Polytechnic Institute, and is a certified Financial Risk Manager. He is fluent in Dutch.
